VPDES Permit Renewal Application BCG Project # 008129-04-001

Dear Mr. Bryan:

On behalf of VDOT, please see the attached VPDES permit renewal application for the above referenced facility.

If you should have any questions comments, please send them directly to me. I can be reached at 757-229-1776. You can also send me an email at jkwiatkowski@bowmanconsulting.com.

Sincerely,

BOWMAN CONSULTING GROUP, LTD.

Jessica M. Kwiatkowski, P.E.

Senior Project Manager

Cc: Mr. Allen Campbell, VDOT (Letter Only)

FORM 2A NPDES

NPDES FORM 2A APPLICATION OVERVIEW

APPLICATION OVERVIEW

Form 2A has been developed in a modular format and consists of a "Basic Application Information" packet and a "Supplemental Application Information" packet. The Basic Application Information packet is divided into two parts. All applicants must complete Parts A and C. Applicants with a design flow greater than or equal to 0.1 mgd must also complete Part B. Some applicants must also complete the Supplemental Application Information packet. The following items explain which parts of Form 2A you must complete.

BASIC APPLICATION INFORMATION:

- A. Basic Application Information for all Applicants. All applicants must complete questions A.1 through A.8. A treatment works that discharges effluent to surface waters of the United States must also answer questions A.9 through A.12.
- B. Additional Application Information for Applicants with a Design Flow ≥ 0.1 mgd. All treatment works that have design flows greater than or equal to 0.1 million gallons per day must complete questions B.1 through B.6.
- C. Certification. All applicants must complete Part C (Certification).

SUPPLEMENTAL APPLICATION INFORMATION:

- D. Expanded Effluent Testing Data. A treatment works that discharges effluent to surface waters of the United States and meets one or more of the following criteria must complete Part D (Expanded Effluent Testing Data):
 - 1. Has a design flow rate greater than or equal to 1 mgd,
 - 2. Is required to have a pretreatment program (or has one in place), or
 - 3. Is otherwise required by the permitting authority to provide the information.
- E. Toxicity Testing Data. A treatment works that meets one or more of the following criteria must complete Part E (Toxicity Testing Data):
 - 1. Has a design flow rate greater than or equal to 1 mgd,
 - 2. Is required to have a pretreatment program (or has one in place), or
 - 3. Is otherwise required by the permitting authority to submit results of toxicity testing.
- F. Industrial User Discharges and RCRA/CERCLA Wastes. A treatment works that accepts process wastewater from any significant industrial users (SIUs) or receives RCRA or CERCLA wastes must complete Part F (Industrial User Discharges and RCRA/CERCLA Wastes). SIUs are defined as:
 - 1. All industrial users subject to Categorical Pretreatment Standards under 40 Code of Federal Regulations (CFR) 403.6 and 40 CFR Chapter I, Subchapter N (see instructions); and
 - 2. Any other industrial user that:
 - a. Discharges an average of 25,000 gallons per day or more of process wastewater to the treatment works (with certain exclusions); or
 - b. Contributes a process wastestream that makes up 5 percent or more of the average dry weather hydraulic or organic capacity of the treatment plant; or
 - c. Is designated as an SIU by the control authority.
- G. Combined Sewer Systems. A treatment works that has a combined sewer system must complete Part G (Combined Sewer Systems).

ALL APPLICANTS MUST COMPLETE PART C (CERTIFICATION)

VDOT I-95 Northbound Rest Area at Carson WWTP VA0086622

BASIC APPLICATION INFORMATION PART A. BASIC APPLICATION INFORMATION FOR ALL APPLICANTS: All treatment works must complete questions A.1 through A.8 of this Basic Application information packet. A.1. Facility Information. Facility name VDOT I-95 Northbound Rest Area at Carson WWTP Mailing Address 1401 E. Broad Street Richmond, Virginia 23219-2000 Contact person Allen A. Campbell Title Safety Rest Area Infrastructure Program Manager, VDOT Maintenance Division Telephone number (804) 786-0668 Facility Address I-95 Northbound Rest Area at Carson WWTP, Mile Marker 36, near Carson, Prince George, Virginia (not P.O. Box) A.2. Applicant Information. If the applicant is different from the above, provide the following: Applicant name Mailing Address Contact person Title Telephone number Is the applicant the owner or operator (or both) of the treatment works? Indicate whether correspondence regarding this permit should be directed to the facility or the applicant. applicant A.3. Existing Environmental Permits. Provide the permit number of any existing environmental permits that have been issued to the treatment works (include state-issued permits). NPDES <u>VA0086622</u> **PSD** UIC Other PWSID No.: 3149370 **RCRA** Other A.4. Collection System Information. Provide information on municipalities and areas served by the facility. Provide the name and population of each entity and, if known, provide information on the type of collection system (combined vs. separate) and its ownership (municipal, private, etc.). Type of Collection System Name **Population Served** Ownership Carson I-95 NB SRA 1,400 Separate State - VDOT

FACILITY NAME AND PERMIT NUMBER: Form Approved 1/14/99 OMB Number 2040-0086 VDOT I-95 Northbound Rest Area at Carson WWTP VA0086622 A.11. Description of Treatment. a. What levels of treatment are provided? Check all that apply. Primary Secondary Advanced Other. Describe: b. Indicate the following removal rates (as applicable): Design BOD_removal or Design CBOD_removal Design SS removal 95 Design P removal NA Design N removal NA c. What type of disinfection is used for the effluent from this outfall? If disinfection varies by season, please describe. Chlorination If disinfection is by chlorination, is dechlorination used for this outfall? Yes No d. Does the treatment plant have post aeration? No A.12. Effluent Testing Information. All Applicants that discharge to waters of the US must provide effluent testing data for the following parameters. Provide the indicated effluent testing required by the permitting authority for each outfall through which effluent is discharged. Do not include information on combined sewer overflows in this section. All information reported must be based on data collected through analysis conducted using 40 CFR Part 136 methods. In addition, this data must comply with QA/QC requirements of 40 CFR Part 136 and other appropriate QA/QC requirements for standard methods for analytes not addressed by 40 CFR Part 136. At a minimum, effluent testing data must be based on at least three samples and must be no more than four and one-half years apart. Outfall number:

BA	SIC APPLICATION INFORMATION
PAR	T B. ADDITIONAL APPLICATION INFORMATION FOR APPLICANTS WITH A DESIGN FLOW GREATER THAN OR EQUAL TO 0.1 MGD (100,000 gallons per day). NOT APPLICABLE
All a	oplicants with a design flow rate ≥ 0.1 mgd must answer questions B.1 through B.6. All others go to Part C (Certification).
B.1.	Inflow and Infiltration. Estimate the average number of gallons per day that flow into the treatment works from inflow and/or infiltration.
	gpd k through the first the second part of the
	Briefly explain any steps underway or planned to minimize inflow and infiltration.
B.2.	Topographic Map. Attach to this application a topographic map of the area extending at least one mile beyond facility property boundaries. This map must show the outline of the facility and the following information. (You may submit more than one map if one map does not show the entire area.)
	a. The area surrounding the treatment plant, including all unit processes.
	b. The major pipes or other structures through which wastewater enters the treatment works and the pipes or other structures through which treated wastewater is discharged from the treatment plant. Include outfalls from bypass piping, if applicable.
	c. Each well where wastewater from the treatment plant is injected underground.
	d. Wells, springs, other surface water bodies, and drinking water wells that are: 1) within 1/4 mile of the property boundaries of the treatment works, and 2) listed in public record or otherwise known to the applicant.
	e. Any areas where the sewage sludge produced by the treatment works is stored, treated, or disposed.
	f. If the treatment works receives waste that is classified as hazardous under the Resource Conservation and Recovery Act (RCRA) by truck, rail, or special pipe, show on the map where that hazardous waste enters the treatment works and where it is treated, stored, and/or disposed.
	Process Flow Diagram or Schematic. Provide a diagram showing the processes of the treatment plant, including all bypass piping and all backup power sources or redundancy in the system. Also provide a water balance showing all treatment units, including disinfection (e.g., chlorination and dechlorination). The water balance must show daily average flow rates at influent and discharge points and approximate daily flow rates between treatment units. Include a brief narrative description of the diagram.
B.4.	Operation/Maintenance Performed by Contractor(s).
	Are any operational or maintenance aspects (related to wastewater treatment and effluent quality) of the treatment works the responsibility of a contractor?YesNo
	If yes, list the name, address, telephone number, and status of each contractor and describe the contractor's responsibilities (attach additional pages if necessary).
	Name:
	Mailing Address:
	Walling Address.
	Telephone Number:
	Responsibilities of Contractor:
	Scheduled Improvements and Schedules of Implementation. Provide information on any uncompleted implementation schedule or uncompleted plans for improvements that will affect the wastewater treatment, effluent quality, or design capacity of the treatment works. If the treatment works has several different implementation schedules or is planning several improvements, submit separate responses to question
	B.5 for each. (If none, go to question B.6.)
	a. List the outfall number (assigned in question A.9) for each outfall that is covered by this implementation schedule.
	hadieste whether the planted improvement of implementation coherent in the latest Coherent Co
	 Indicate whether the planned improvements or implementation schedule are required by local, State, or Federal agencies. YesNo

С	If the answer to B	.5.b is "Yes," brie	efly describe, inc	luding new m	naximum daily inflor	w rate (if applicat	ole).

BASIC APPLICATION INFORMATION	
PART C. CERTIFICATION	
All applicants must complete the Certification Section. Refer to instructions to determine who is an officer for the purposes of this certification. All applicants must complete all applicable sections of Form 2A, as explained in the Application Overview. Indicate below which parts of Form 2A you have completed and are submitting. By signing this certification statement, applicants confirm that they have reviewed Form 2A and have completed all sections that apply to the facility for which this application is submitted.	j
Indicate which parts of Form 2A you have completed and are submitting:	
Basic Application Information packet Supplemental Application Information packet:	
Part D (Expanded Effluent Testing Data)	
Part E (Toxicity Testing: Biomonitoring Data)	
Part F (Industrial User Discharges and RCRA/CERCLA Wastes)	
Part G (Combined Sewer Systems)	
ALL APPLICANTS MUST COMPLETE THE FOLLOWING CERTIFICATION.	
I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.	
Name and official title Allen A. Campbell, SRA Infrastructure Program Manager, VDOT Maintenance Div	
Signature Signature	
Telephone number (804) 786-0668	
Date signed 2-9-16	
Upon request of the permitting authority, you must submit any other information necessary to assess wastewater treatment practices at the treatment works or identify appropriate permitting requirements.	T.

SUPPLEMENTAL APPLICATION INFORMATION

PART D. EXPANDED EFFLUENT TESTING DATA NOT APPLICABLE

Refer to the directions on the cover page to determine whether this section applies to the treatment works.

Effluent Testing: 1.0 mgd and Pretreatment Treatment Works. If the treatment works has a design flow greater than or equal to 1.0 mgd or it has (or is required to have) a pretreatment program, or is otherwise required by the permitting authority to provide the data, then provide effluent testing data for the following pollutants. Provide the indicated effluent testing information and any other information required by the permitting authority for each outfall through which effluent is discharged. Do not include information on combined sewer overflows in this section. All information reported must be based on data collected through analyses conducted using 40 CFR Part 136 methods. In addition, these data must comply with QA/QC requirements of 40 CFR Part 136 and other appropriate QA/QC requirements for standard methods for analytes not addressed by 40 CFR Part 136. Indicate in the blank rows provided below any data you may have on pollutants not specifically listed in this form. At a minimum, effluent testing data must be based on at least three pollutant scans and must be no more than four and one-half years old.

SUPPLEMENTAL APPLICATION INFORMATION

PART E. TOXICITY TESTING DATA NOT APPLICABLE

POTWs meeting one or more of the following criteria must provide the results of whole effluent toxicity tests for acute or chronic toxicity for each of the facility's discharge points: 1) POTWs with a design flow rate greater than or equal to 1.0 mgd; 2) POTWs with a pretreatment program (or those that are required to have one under 40 CFR Part 403); or 3) POTWs required by the permitting authority to submit data for these parameters.

- At a minimum, these results must include quarterly testing for a 12-month period within the past 1 year using multiple species (minimum of two species), or the results from four tests performed at least annually in the four and one-half years prior to the application, provided the results show no appreciable toxicity, and testing for acute and/or chronic toxicity, depending on the range of receiving water dilution. Do not include information on combined sewer overflows in this section. All information reported must be based on data collected through analysis conducted using 40 CFR Part 136 methods. In addition, this data must comply with QA/QC requirements of 40 CFR Part 136 and other appropriate QA/QC requirements for standard methods for analytes not addressed by 40 CFR Part 136.
- In addition, submit the results of any other whole effluent toxicity tests from the past four and one-half years. If a whole effluent toxicity test conducted during the past four and one-half years revealed toxicity, provide any information on the cause of the toxicity or any results of a toxicity reduction evaluation, if one was conducted.
- If you have already submitted any of the information requested in Part E, you need not submit it again. Rather, provide the information requested in question E.4 for previously submitted information. If EPA methods were not used, report the reasons for using alternate methods. If test summaries are available that contain all of the information requested below, they may be submitted in place of Part E.
 If no biomonitoring data is required, do not complete Part E. Refer to the Application Overview for directions on which other sections of the form to

complete E.1. Required Tests. Indicate the number of whole effluent toxicity tests conducted in the past four and one-half years. chronic E.2. Individual Test Data. Complete the following chart for each whole effluent toxicity test conducted in the last four and one-half years. Allow one column per test (where each species constitutes a test). Copy this page if more than three tests are being reported. Test number: Test number: Test number: a. Test information. Test species & test method number Age at initiation of test Outfall number Dates sample collected Date test started Duration b. Give toxicity test methods followed. Manual title Edition number and year of publication Page number(s) c. Give the sample collection method(s) used. For multiple grab samples, indicate the number of grab samples used. 24-Hour composite Grab d. Indicate where the sample was taken in relation to disinfection. (Check all that apply for each) Before disinfection After disinfection After dechlorination

SUPPLEMENTAL APPLICATION INFORMATION

PART F. INDUSTRIAL USER DISCHARGES AND RCRA/CERCLA WASTES NOT APPLICABLE

All tre	eatment works receiving discharges from significant industrial users or which receive RCRA, CERCLA, or other remedial wastes must lete Part F.
GEN	ERAL INFORMATION:
F.1.	Pretreatment Program. Does the treatment works have, or is it subject to, an approved pretreatment program?YesNo
F.2.	Number of Significant Industrial Users (SIUs) and Categorical Industrial Users (CIUs). Provide the number of each of the following types of industrial users that discharge to the treatment works.
	a. Number of non-categorical SIUs.
	b. Number of CIUs.
SIGN	NIFICANT INDUSTRIAL USER INFORMATION:
Suppl and p	ly the following information for each SIU. If more than one SIU discharges to the treatment works, copy questions F.3 through F.8 rovide the information requested for each SIU.
F.3.	Significant Industrial User Information. Provide the name and address of each SIU discharging to the treatment works. Submit additional pages as necessary.
	Name:
	pribrance inflate situat i independint tali priminis dal tentro de la contractió combandado de priministra (c. 1638). Mailing Address: Priminis de la contractió de la contracti
F.5.	Industrial Processes. Describe all of the industrial processes that affect or contribute to the SIU's discharge. Principal Product(s) and Raw Material(s). Describe all of the principal processes and raw materials that affect or contribute to the SIU's discharge.
	Principal product(s):
	Raw material(s): Flow Rate.
	 Process wastewater flow rate. Indicate the average daily volume of process wastewater discharged into the collection system in gallons per day (gpd) and whether the discharge is continuous or intermittent.
	gpd (continuous orintermittent)
į	 Non-process wastewater flow rate. Indicate the average daily volume of non-process wastewater flow discharged into the collection system in gallons per day (gpd) and whether the discharge is continuous or intermittent. gpd (continuous orintermittent)
F.7. F	Pretreatment Standards. Indicate whether the SIU is subject to the following:
i	a. Local limitsYesNo
į	b. Categorical pretreatment standardsYesNo
!	If subject to categorical pretreatment standards, which category and subcategory?

2A YOU MUST COMPLETE

VDOT I-95 Northbound Rest Area at Carson WWTP VA0086622

Form Approved 1/14/99 OMB Number 2040-0086

SUPPLEMENTAL APPLICATION INFORMATION	
PART G. COMBINED SEWER SYSTEMS NOT APPLICABLE	
If the treatment works has a combined sewer system, complete Part G.	
G.1. System Map. Provide a map indicating the following: (may be included with Basic Applications)	ation Information)
a. All CSO discharge points.	
 b. Sensitive use areas potentially affected by CSOs (e.g., beaches, drinking water suppoutstanding natural resource waters). 	lies, shellfish beds, sensitive aquatic ecosystems, and
c. Waters that support threatened and endangered species potentially affected by CSO:	S.
G.2. System Diagram. Provide a diagram, either in the map provided in G.1. or on a separate	e drawing, of the combined sewer collection system
that includes the following information:	
a. Locations of major sewer trunk lines, both combined and separate sanitary.	
b. Locations of points where separate sanitary sewers feed into the combined sewer sys	stem.
c. Locations of in-line and off-line storage structures.	
d. Locations of flow-regulating devices.	
e. Locations of pump stations.	
CSO OUTFALLS:	and other and the defect of the state of the
Complete questions G.3 through G.6 once for each CSO discharge point.	
a. Oddan number	
b. Location (City or town, if applicable)	(Zip Code)
(County)	(State)
(Latitude)	(Longitude)
c. Distance from shore (if applicable)	_ft.
d. Depth below surface (if applicable)	_ft.
e. Which of the following were monitored during the last year for this CSO?	
RainfallCSO pollutant concentrationsCSO free	quency
CSO flow volumeReceiving water quality	
f. How many storm events were monitored during the last year?	
G.4. CSO Events.	
a. Give the number of CSO events in the last year.	
b. Give the average duration per CSO event.	
b. Give the average duration per CSO eventhours (actual orapprox.)	

FACILITY NAME AND PERMIT NUMBER: Form Approved 1/14/99 OMB Number 2040-0086 VDOT I-95 Northbound Rest Area at Carson WWTP VA0086622 c. Give the average volume per CSO event. million gallons (_____ actual or ____ approx.) d. Give the minimum rainfall that caused a CSO event in the last year. inches of rainfall G.5. Description of Receiving Waters. a. Name of receiving water: b. Name of watershed/river/stream system:_ United States Soil Conservation Service 14-digit watershed code (if known): c. Name of State Management/River Basin: United States Geological Survey 8-digit hydrologic cataloging unit code (if known): G.6. CSO Operations. Describe any known water quality impacts on the receiving water caused by this CSO (e.g., permanent or intermittent beach closings, permanent or intermittent shell fish bed closings, fish kills, fish advisories, other recreational loss, or violation of any applicable State water quality standard). END OF PART G. REFER TO THE APPLICATION OVERVIEW TO DETERMINE WHICH OTHER PARTS OF FORM 2A YOU MUST COMPLETE.

Additional information, if provide	ded, will appear on the fol	llowing pages.			

VPDES Permit Application Addendum

1. Entity to whom the permit is to be issued: Virginia Department of Transportation
Who will be legally responsible for the wastewater treatment facilities and compliance with the permit? This may or may not be the facility or property owner.
2. Is this facility located within city or town boundaries? Yes No
3. Provide the tax map parcel number for the land where the discharge is located. 62A-64
4. For the facility to be covered by this permit, how many acres will be disturbed during the next
five years due to new construction activities? 0
5. What is the design average effluent flow of this facility? 0.04 MGD For industrial facilities, provide the max. 30-day average production level, include units:
In addition to the design flow or production level, should the permit be written with limits for any other discharge flow tiers or production levels? Yes \(\square \) No \(\square \) If "Yes", please identify the other flow tiers (in MGD) or production levels:
Please consider the following questions for both the flow tiers and the production levels (if applicable): Do you plan to expand operations during the next five years? Is your facility's design flow considerably greater than your current flow? 6. Nature of operations generating wastewater: VDOT Safety Rest Area
100 % of flow from domestic connections/sources
Number of private residences to be served by the treatment works:
0 % of flow from non-domestic connections/sources
7. Mode of discharge :
3. Identify the characteristics of the receiving stream at the point just above the facility's discharge point: Permanent stream, never dry
Intermittent stream, usually flowing, sometimes dry
Ephemeral stream, wet-weather flow, often dry
Effluent-dependent stream, usually or always dry without effluent flow
Lake or pond at or below the discharge point
X Other: Swampy Area
P. Approval Date(s): O & M Manual 3/7/11 Sludge/Solids Management Plan 9/25/06
Have there been any changes in your operations or procedures since the above approval dates? Yes No
The property management firm, TME, has contracted with a different wastewater/water contract operator for
facility than detailed in the approved facility O&M Manual. The current wastewater facility contract operator

Retaw Engineering, P.O. Box 5881, Midlothian, VA 23112. The phone number for the contract operator is 804 744-1792. The Department of Environmental Quality was previously notified of the operator change/authorized agent for routine DMR submission.

PUBLIC NOTICE BILLING INFORMATION

I hereby authorize the Department of Environmental Quality to have the cost of publishing a public notice billed to the Agent/Department shown below. The public notice will be published once a week for two consecutive weeks in Progress-Index (15 Franklin St., Petersburg, VA 23804) in accordance with 9 VAC 25-31-290.C.2.

Agent/Department to be billed:	Virginia Department of Transportation
Owner:	ATTN: Allen A. Campbell
Agent/Department Address:	1401 E. Broad Street
	Richmond, Virginia 23219
Agent's Telephone No.:	(804) 786-0668
Printed Name:	Allen Campbell

FACILITY NAME: VDOT I-95 NB Rest Area at Carson WWTP VPDES PERMIT NUMBER: VA0086622 VPDES SEWAGE SLUDGE PERMIT APPLICATION FORM

SCREENING INFORMATION

This application is divided into sections. Sections A pertain to all applicants. The applicability of Sections B, C and D depend on your facility's sewage sludge use or disposal practices. The information provided on this page will help you determine which sections to fill out.

		your facility's sewage sludge use or disposal practices. The information provided on this page will help you ich sections to fill out.
1.	All a	pplicants must complete Section A (General Information).
2.	Will	this facility generate sewage sludge? X Yes No
	Will	this facility derive a material from sewage sludge?Yes _X_No
		u answered Yes to either, complete Section B (Generation Of Sewage Sludge Or Preparation Of A Material wed From Sewage Sludge).
3.	Will	this facility apply sewage sludge to the land?Yes _X_No
	Will	sewage sludge from this facility be applied to the land? X Yes No
	If you	u answered No to both questions above, skip Section C.
	If you	u answered Yes to either, answer the following three questions:
	a.	Will the sewage sludge from this facility meet the ceiling concentrations, pollutant concentrations, Class A pathogen reduction requirements and one of the vector attraction reduction requirements 1-8, as identified in the instructions? Yes _X_No
	b.	Will sewage sludge from this facility be placed in a bag or other container for sale or give-away for application to the land?Yes _X_No
	c.	Will sewage sludge from this facility be sent to another facility for treatment or blending? X_YesNo
	If you	u answered No to all three, complete Section C (Land Application Of Bulk Sewage Sludge).
	If you	u answered Yes to a, b or c, skip Section C.
4.	Do yo	ou own or operate a surface disposal site?Yes _X_No
	If Ye	s, complete Section D (Surface Disposal).

8. Storage Requirements.

Existing and proposed sludge storage facilities must provide an estimated annual sludge balance on a monthly basis incorporating such factors as storage capacity, sludge production and land application schedule. Include pertinent calculations justifying storage requirements.

Proposed sludge storage facilities must also provide the following information:

- a. A sludge storage site layout on a 7.5 minute topographic quadrangle or other appropriate scaled map to show the following topographic features of the surrounding landscape to a distance of 0.25 mile. Clearly mark the property line.
 - 1) Water wells, abandoned or operating
 - 2) Surface waters
 - 3) Springs
 - 4) Public water supply(s)
 - 5) Sinkholes
 - 6) Underground and/or surface mines
 - 7) Mine pool (or other) surface water discharge points
 - 8) Mining spoil piles and mine dumps
 - 9) Quarry(s)
 - 10) Sand and gravel pits
 - 11) Gas and oil wells
 - 12) Diversion ditch(s)
 - 13) Agricultural drainage ditch(s)
 - 14) Occupied dwellings, including industrial and commercial establishments
 - 15) Landfills or dumps
 - 16) Other unlined impoundments
 - 17) Septic tanks and drainfields
 - 18) Injection wells
 - 19) Rock outcrops
- b. A topographic map of sufficient detail to clearly show the following information:
 - 1) Maximum and minimum percent slopes
 - 2) Depressions on the site that may collect water
 - 3) Drainageways that may attribute to rainfall run-on to or runoff from this site
 - 4) Portions of the site (if any) which are located with the 100-year floodplain and how the storage facility will be protected from flooding
- c. Data and specifications for the storage facility lining material.
- d. Plan and cross-sectional views of the storage facility.
- e. Depth from the bottom of the storage facility to the seasonal high water table and separation distance to the permanent water table.
- 9. Land Area Requirements. Provide calculations justifying the land area requirements for land application of sewage sludge taking into consideration average soil productivity group, crop(s) to be grown and most limiting factor(s) of the sewage sludge, specifically Plant Available Nitrogen (PAN), Calcium Carbonate Equivalence (CCE), and metal loadings (CPLR sewage sludge only), where applicable. Relate PAN, CCE, and metal loadings to demonstrate the most limiting factor for land application.
- 10. Landowner Agreement Forms. Provide a properly completed **Land Application Agreement Biosolids** Form and necessary attachments (attached at end of VPDES Sewage Sludge Permit Application Form) for each landowner if sewage sludge is to be applied onto land not owned by the applicant.
- 11. Ground Water Monitoring.

Are any ground water monitoring data available for this land application site? __Yes __No If yes, submit the ground water monitoring data with this permit application. Also submit a written description of the well locations, approximate depth to ground water, and the ground water monitoring procedures used to obtain these data.

12. Land Application Site Information.

(Complete Items a-d for sites receiving infrequent application - land application of sewage sludge up to the agronomic rate at a frequency of once in a 3 year period; complete Items a-h for sites receiving frequent application - land application of sewage sludge in excess of 70% the agronomic rate at a frequency greater than once in a 3 year period)

- a. Provide a general location map for each county which clearly indicates the location of all the land application sites.
- b. For each land application site provide a site plan of sufficient detail to clearly show the concerned landscape features and associated buffer zones (See instructions). Provide a legend for each landscape feature and the net acreage for each field taking into account the proposed buffer zones.
- c. In order to ensure that land application of bulk sewage sludge will not impact federally listed threatened or endangered species or federally designated critical habitat, the applicant must notify the field office of the U. S. Department of the Interior, Fish and Wildlife Service (FWS), by a letter, the proposed land application activities with the identification of the land application sites. The address and phone number of FWS are provided below.

U. S. Fish and Wildlife Service Virginia Field Office 6669 Short Lane Gloucester, VA 23061 TEL: (804)693-6694

Provide a copy of the notification letter with this application form.

- d. Provide a soil survey map, preferably photographically based, with the field boundaries clearly marked. (A USDA-SCS soil survey map should be provided, if available.)
 Provide a detailed legend for each soil survey map which uses accepted USDA-SCS descriptions of the typifying pedon for each soil series (soil type). Complex associations may be described as a range of characteristics. Soil descriptions shall include as a minimum the following information.
 - 1) Soil symbol
 - 2) Soil series, textural phase and slope range
 - 3) Depth to seasonal high water table
 - 4) From Depth to bedrock the value of the second state of the second state of the second seco
 - 5) Estimated soil productivity group (for the proposed crop rotation)

Item e - h are required for sites receiving frequent application of sewage sludge

- e. In order to verify the information provided in item d, characterize the soil at each land application site.

 Representative soil borings or test pits to a depth of five feet or to bedrock if shallower, are to be coordinated for the typifying pedon of each soil series (soil type). Soil descriptions shall include as a minimum the following information:
 - 1). Soil symbol
 - 2). Soil series, textural phase and slope range
 - 3). Depth to seasonal high water table
 - 4). Depth to bedrock
 - 5). Estimated soil productivity group (for the proposed crop rotation)

FACILITY NAME: VDOT I-95 NB Rest Area at Carson WWTP

VPDES PERMIT NUMBER: VA0086622

Collect and analyze soil samples from each field, weighted to best represent each of the soil borings performed for Item e. Using the table below or a separate attachment, provide at least one analysis per sample for each of the following parameters.

Soil Organic Matter (%)

Soil pH (std. units)

Cation Exchange Capacity (meq/100g)

Total Nitrogen (ppm)

Organic Nitrogen (ppm)

Ammonia Nitrogen (ppm)

Nitrate Nitrogen (ppm)

Available Phosphorus (ppm)

Exchangeable Potassium (mg/100g)

Exchangeable Sodium (mg/100g)

Exchangeable Calcium (mg/100g)

Exchangeable Magnesium (mg/100g)

Arsenic (ppm)

Cadmium (ppm)

Copper (ppm)

Lead (ppm)

Mercury (ppm)

Molybdenum (ppm)

Nickel (ppm)

Selenium (ppm)

Zinc (ppm)

Manganese (ppm) - American services and the distribution of the properties of the contract of

Particle Size Analysis or

USDA Textural Estimate (%)

- Relate the crop nutrient needs to anticipated yields, soil productivity rating and the various fertilizer or g. nutrient sources from sludge and chemical fertilizers. Describe any specialized agronomic management practices which may be required as a result of high soil pH. If the sludge is expected to possess an unusually high CCE or other unusual properties, provide a description of any plant tissue testing, supplemental fertilization or intensive agronomic management practices which may be necessary.
- h. Using a narrative format and referencing any related charts, describe the proposed cropping system. Show how the crop rotation and management will be coordinated with the design of the land application system. Include any supplemental fertilization program, soil testing and the coordination of tillage practices, planting and harvesting schedules and timing of land application.

SECTION D. SURFACE DISPOSAL N/A MARKET N/A MARKET N/A

Complete this section only if you own or operate a surface disposal site. Provide the information for each active sewage sludge unit.

a.	mation on Active Sewage Sludge Units. Unit name or number:
a. b.	
υ.	
	County: City or Town: State: Zip:
	ii I atituda State Zip.
	ii. Latitude: Longitude:
	Method of latitude/longitude determination
	USGS map Filed survey Other Topographic map. Provide a topographic map (or other appropriate map if a topographic map is unavailable
c.	that shows the site location.
d.	Total dry metric tons of sewage sludge placed on the active sewage sludge unit per 365-day period:
u.	dry metric tons.
e.	Total dry metric tons of sewage sludge placed on the active sewage sludge unit over the life of the unit:
С.	dry metric tons.
f.	Does the active sewage sludge unit have a liner with a minimum hydraulic conductivity of
	1 x 10 ⁻⁷ cm/sec?YesNo If yes, describe the liner or attach a description.
σ	Does the active sewage sludge unit have a leachate collection system?YesNo
g.	If yes, describe the leachate collection system or attach a description. Also, describe the method used for
	leachate disposal and provide the numbers of any federal, state or local permits for leachate disposal:
h.	If you answered no to either f or g, answer the following:
	Is the boundary of the active sewage sludge unit less than 150 meters from the property line of the surface
	disposal site?YesNo If yes, provide the actual distance in meters:
i.	Remaining capacity of active sewage sludge unit, in dry metric tons: dry metric tons
	Anticipated closure date for active sewage sludge unit, if known: (MM/DD/YYYY)
	Provide with this application a copy of any closure plan developed for this active sewage sludge unit.
Sewa	ge Sludge from Other Facilities.
Is sev	vage sludge sent to this active sewage sludge unit from any facilities other than yours?YesNo
If yes	, provide the following information for each such facility, attach additional sheets as necessary.
a.	Facility name:
b.	Facility contact:
	Title:
	Phone: ()
c.	Mailing address.
	Street or P.O. Box:
	City or Town: State: Zip:
d.	List, on this form or an attachment, the facility's VPDES permit number as well as the numbers of all other
	federal, state or local permits that regulate the facility's sewage sludge management practices:
	Permit Number: Type of Permit:
6	Which class of pathogen reduction is achieved before sewage sludge leaves the other facility?
e.	Class AClass BNeither or unknown
f.	Describe, on this form or on another sheet of paper, any treatment processes used at the other facility to
1.	
	reduce pathogens in sewage sludge:

2.

FACILITY NAME: VDOT I-95 NB Rest Area at Carson WWTP VPDES PERMIT NUMBER: VA0086622 Which vector attraction reduction option is achieved before sewage sludge leaves the other facility? g. ___ Option 1 (Minimum 38 percent reduction in volatile solids) ___ Option 2 (Anaerobic process, with bench-scale demonstration) ___ Option 3 (Aerobic process, with bench-scale demonstration) ___ Option 4 (Specific oxygen uptake rate for aerobically digested sludge) ___ Option 5 (Aerobic processes plus raised temperature) ___ Option 6 (Raise pH to 12 and retain at 11.5) ___ Option 7 (75 percent solids with no unstabilized solids) ___ Option 8 (90 percent solids with unstabilized solids) None or unknown Describe, on this form or another sheet of paper, any treatment processes used at the other facility to reduce h. vector attraction properties of sewage sludge: Describe, on this form or another sheet of paper, any other sewage sludge treatment activities performed by i. the other facility that are not identified in e - h above: 3. Vector Attraction Reduction. Which vector attraction reduction option, if any, is met when sewage sludge is placed on this active sewage sludge unit? ___ Option 9 (Injection below land surface) __ Option 10 (Incorporation into soil within 6 hours) Option 11 (Covering active sewage sludge unit daily) Describe, on this form or another sheet of paper, any treatment processes used at the active sewage sludge b. unit to reduce vector attraction properties of sewage sludge: Ground Water Monitoring. 4. Is ground water monitoring currently conducted at this active sewage sludge unit or are ground water monitoring data otherwise available for this active sewage sludge unit? ___Yes ___No If yes, provide a copy of available ground water monitoring data. Also provide a written description of the well locations, the approximate depth to ground water, and the ground water monitoring procedures used to

- obtain these data.
- Has a ground water monitoring program been prepared for this active sewage sludge unit? b. __Yes __No If yes, submit a copy of the ground water monitoring program with this application.
- Have you obtained a certification from a qualified ground water scientist that the aquifer below the active c. sewage sludge unit has not been contaminated? __Yes __No If yes, submit a copy of the certification with this application.

J.	13111	1111111	11.	imits.
		L		

Are you seeking site-specific pollutant limits for the sewage sludge placed on the active sewage sludge unit? _Yes _No If yes, submit information to support the request for site-specific pollutant limits with this application.

VPDES SEWAGE SLUDGE PERMIT APPLICATION FORM LAND APPLICATION AGREEMENT - BIOSOLIDS N/A County or City: Permittee: ___ Landowner: ____ Landowner Site Management Requirements: I, the Landowner, I have received a DEQ Biosolids Fact Sheet that includes information regarding regulations governing the land application of biosolids, the components of biosolids and proper handling and land application of biosolids. I have also been expressly advised by the Permittee that the site management requirements and site access restrictions identified below must be complied with after biosolids have been applied on my property in order to protect public health, and that I am responsible for the implementation of these practices. I agree to implement the following site management practices at each site under my ownership following the land application of biosolids at the site: 1. Notification Signs: I will not remove any signs posted by the Permittee for the purpose of identifying my field as a biosolids land application site, unless requested by the Permittee, until at least 30 days after land application at that site is completed. 2. Public Access Public access to land with a high potential for public exposure shall be restricted for at least one year following any application of biosolids. Public access to land with a low potential for public exposure shall be restricted for at least 30 days following any application of biosolids. No biosolids amended soil shall be excavated or removed from the site during this same period of time unless adequate provisions are made to prevent public exposure to soil, dusts or aerosols: Turf grown on land where biosolids are applied shall not be harvested for one year after application of biosolids when the harvested turf is placed on either land with a high potential for public exposure or a lawn, unless otherwise specified by DEQ. 3. Crop Restrictions: a. Food crops with harvested parts that touch the biosolids/soil mixture and are totally above the land surface shall not be harvested for 14 months after the application of biosolids. b. Food crops with harvested parts below the surface of the land shall not be harvested for 20 months after the application of biosolids when the biosolids remain on the land surface for a time period of four (4) or more months prior to incorporation into the soil, c. Food crops with harvested parts below the surface of the land shall not be harvested for 38 months when the biosolids remain on the land surface for a time period of less than four (4) months prior to d. Other food crops and fiber crops shall not be harvested for 30 days after the application of biosolids; e. Feed crops shall not be harvested for 30 days after the application of biosolids (60 days if fed to lactating dairy animals). 4. Livestock Access Restrictions: Following biosolids application to pasture or hayland sites: a. Meat producing livestock shall not be grazed for 30 days, b. Lactating dairy animals shall not be grazed for a minimum of 60 days. c. Other animals shall be restricted from grazing for 30 days; 5. Supplemental commercial fertilizer or manure applications will be coordinated with the biosolids and industrial residuals applications such that the total crop needs for nutrients are not exceeded as identified in the nutrient management plan developed by a person certified in accordance with §10.1-104.2 of the Code of Virginia; 6. Tobacco, because it has been shown to accumulate cadmium, should not be grown on the Landowner's land for three years following the application of biosolids or industrial residuals which bear cadmium equal to or exceeding 0.45 pounds/acre (0.5 kilograms/hectare).
